Subject: 8A.d. IMBC Provider Forum

Recommendation  
Provide feedback and direction on formation on Provider Forum.

Discussion  
Per the approved Inyo-Mono Broadband Consortium Work Plan, Item 1B identifies the effort of establishing a Provider Forum. The activity was designed to “Identify and develop strategies to overcome threats to the sustainability of existing public and private investments in Digital 395 and other middle and last mile broadband projects.” Ideally, discussions and efforts would lead to strategies that inform adoption campaigns, inform grant submissions, and local government investments, and development of deployment strategies which support the goal of 98% broadband adoption.

After initial conversations within the breakout group associated with this item, it was determined that some feedback from the IMBC Board was necessary before moving forward. Specifically, there were two questions which additional input is desired on:

1. Are there specific objectives or outcomes that the IMBC Board would like to have from this group?
2. Should the focus of the discussions be aimed primarily at short-term needs, or long-term goals, or both?

Fiscal Impact  
None at this time.
